

Motion Technologies Pty Ltd

Mission Statement

Motion Technologies aims to provide genuine value to our customers and partners by presenting innovative, practical and cost effective engineered solutions to satisfy our customer's requirements.

We have developed key expertise in the fields of power linear motion, linear guidance, automation, motion control, geared mechanical power transmission and electronic drives. We continue to strive for improvement taking advantage of new and future technologies.

This is achieved by actively promoting our principals' product ranges and expanding their market share across Australia in the manufacturing, defence, medical and mining sectors.

In doing so, we shall support and develop our people to maximise their individual and collective potential with the nett benefit of being able to provide satisfaction to our customers, clients and shareholders.

Motion Technologies shall accomplish these goals by setting realistic objectives and working in a practical and cost effective manner. We operate with honesty, integrity and without losing sight of the need for corporate growth and profitability.

Our aim is to lead in the innovation and development of technologies within the scope of our key competencies and in doing so participate in a global economy.
